DRAFTING AND ENGINEERING

## SELF FRAMED METAL BUILDINGS

We offer a diverse selection of structural buildings made available to meet your custom needs. Highland Structures offers steel framed and self-supported buildings that are built with full steel skids or steel framed.

Polyurethane buildings are also available. Buildings are manufactured at our facility, transported to site or built on site. From portable to permanent, we custom build it all. With an exterior made from colored steel, these structures are built to last.

Buildings/structures can be custom made to any size with a variety of interior/exterior options and accessories. They can be built on concrete, steel or wood. The interiors of cabins, offices, etc. can be finished with tongue and groove pine, cedar or drywall. Counters and cabinets are also interior options. Electrical and plumbing also available.

### STANDARD MATERIALS LIST:

- Exteriors: 22 gauge galvanized/galvalume, 22 gauge pre-coat steel, 22 gauge galvanized steel
- Interiors: 20 gauge perforated utility aluminum, 20 gauge fluted aluminum, 28 gauge fluted galvanized
- Floor Insulation: Urethane spray foam insulation c/w elastomeric sealer R 12
- Wall Insulation: fibreglass friction fit R 12 - R20
- Roof Insulation: fibreglass friction fit R 12- R45
- Sound Dampening: insulations available
- Vapour Barrier: 6 mil standard

### STANDARD MATERIALS LIST:

- Oil Field Skids, Portable Test Units and Buildings
- Cladded buildings, lease and generator shacks
- Storage Units - built on site or skid mounted portables
- Garages and Workshops, two pieced for transportation or site built
- Cabin structures
- Portable Bathrooms and Showers
- Office Buildings - Permanent or Portable
- Can custom design and build to your requirements
- MCC Buildings
- Generator Building
- Pump Jack Enclosures
